

# Roulette Rules

- The Roulette Wheel has numbers from 1 to 36, plus '0' and '00'. The numbers are alternately colored red and black with the '0' and '00' in green.
- Chips ranging in value can be bought in stacks of 20 from the dealer. Each player determines what the chips are worth when they buy-in and are given their own color. Generally each chip is worth \$1. These special colored Roulette chips have no value on any other game, it is important that you redeem them before you leave the roulette table.
- Play begins when the players have made most of their bets by placing chips on the numbered layout. The dealer then spins the white ball in the opposite direction of the spinning wheel.
- You may bet on single numbers or combinations of two or more numbers. You may also bet on odd, even, black or red. The amount of return on your bet depends on two things: the amount of your bet and the type of bet you've made.
- Roulette Payoffs

Single Numbers	35 to 1
Double Numbers	17 to 1
Three Numbers	11 to 1
Four Numbers	8 to 1
Five Numbers	6 to 1
Six Numbers	5 to 1
Columns	2 to 1
Dozens	2 to 1
1 to 18 or 19 to 36	Pays Even
Odd or Even	Pays Even
Red or Black	Pays Even
- Bets may be made until the dealer calls 'No more bets, please.' The dealer places a marker on the winning number and pays bets accordingly. No bets may be placed or taken from the layout until the marker is removed from the winning number.
